

PROFESSIONAL SUMMARY

Full-Stack Engineer experienced in React, TypeScript, Python, FastAPI, Django REST, PostgreSQL, MongoDB, and Docker. Built AI applications around agent workflows, LLM inference, retrieval, guardrails, and automated evaluation, including a private campus AI platform supporting 8,000+ users. Currently a Specialist Programmer at Infosys developing React and FastAPI modules for an internal enterprise portal.

EXPERIENCE

- Infosys

Specialist Programmer

Aug. 2025 – Present

– Developed the internal TPD Demand Module using React (TSX), Recharts, FastAPI, and PostgreSQL to visualize talent allocation against open project demands.

– Built asynchronous aggregation endpoints and demand-vs-talent reporting flows from business requirements; collaborated with the enterprise DevOps team for containerized deployment.
- Karunya Institute of Technology and Sciences

Student Developer – Earn While You Learn

2023 – 2025

Coimbatore, India

– Led development of university software tools for placement, laboratory evaluation, guided learning, attendance, and event workflows using React, Django REST Framework, PostgreSQL, Docker, and code-server.

– Delivered systems actively used by students, including LabTutor for 70+ students and Aptitutor for 4,000+ university students.

PROJECTS

- Sofie(Chatbot)

Private campus GenAI platform serving 8,000+ users; deployed LLaMA on a 4x L40S cluster using Triton and vLLM with guardrails and telemetry.

2024

Tools & technologies used: Triton, vLLM, LLaMA, NeMo Guardrails, FastAPI, Docker, Graylog
- Rachel (Interview Bot)

AI mock interview platform using resume/JD context, Whisper, adaptive questioning, retrieval, and post-interview diagnostics.

2024

Tools & technologies used: React.js, FastAPI, Whisper, LLaMA, Triton Inference Server, LangChain, Milvus, PostgreSQL
- CodeTutor

AI DSA platform with web coding, Judge0 evaluation for Python/C/C++/Java, and LLaMA-guided conceptual hints.

Oct. 2025 – Nov. 2025

Tools & technologies used: React.js, Django REST Framework, PostgreSQL, Judge0 API, Triton, LLaMA, NeMo Guardrails, Docker
- LabTutor

Laboratory examination platform with automated grading, viva modules, reports, and browser-based code-server environments; deployed for 70+ students.

Oct. 2025 – Nov. 2025

Tools & technologies used: React.js, Django REST Framework, PostgreSQL, Docker, Judge0, code-server, pdflatex
- DNS Threat Filter (SIH 2023)

AI-assisted DNS filtering platform for ISRO SIH1524 using threat intelligence, Zeek, Unbound, and ML classification; added an asynchronous false-positive resolver.

Dec. 2023

Tools & technologies used: React.js, Django REST Framework, Zeek, Unbound DNS, HAProxy, Nginx, Redis, CockroachDB, MongoDB

TECHNICAL SKILLS

- Agentic AI: Agent State Machines, Tool Calling, Autonomous Workflows, RAG Agents, CRAG, Structured Outputs
- Generative AI: LangChain, LLaMA, Milvus, BM25, Dense Retrieval, Cross-Encoder Re-ranking, NeMo Guardrails, Whisper
- AI Systems & Inference: Triton Inference Server, vLLM Backend, Multi-GPU Inference, Open WebUI, Graylog, FastAPI
- Full-Stack / MERN: React.js, TypeScript, JavaScript, Node.js, Express.js, Django, Django REST Framework, PostgreSQL, MongoDB, Redis
- DevOps & Systems: Docker, Docker Compose, Kubernetes, Nginx, Linux, Bash, Git, Zeek, Unbound DNS, iptables

EDUCATION

Karunya Institute of Technology and Sciences

B.Tech. in Computer Science and Engineering

2021 – 2025

LEADERSHIP & COMMUNITY

- Founder & Head, Web & App Development Club, KITS – trained 200+ students in modern web technologies

Aug. – Sep. 2023
- Core Team Member, KHacks, KITS – contributed to 50+ technical workshops and AI outreach for 500+ students

Dec. 2022 – Dec. 2024

ACHIEVEMENTS

- National Grand Finale Finalist, Smart India Hackathon 2023 – ISRO SIH1524; Top 0.1% of 44,000 teams

2023
- National Grand Finale Finalist, KAVACH 2023 Cybersecurity Hackathon; Top 1% of 3,800 teams

2023
- State Grand Finale Finalist, Tamil Nadu Police Hackathon 2023; Top 300 teams

2023
